

CONSULTING SERVICES

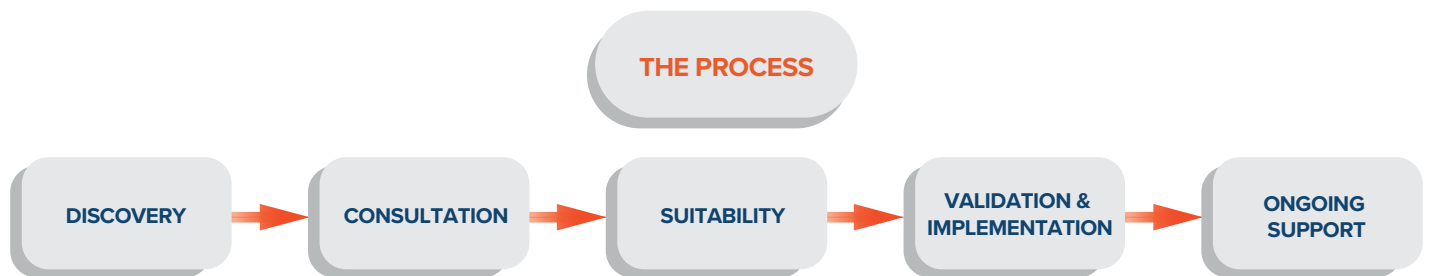

Accredited by:

PinPoint's team of highly qualified consultants offer on & off-site consulting services to both public and private laboratories specializing in small molecule detection via mass spectrometry.

▶ **ANAB - ISO17025**

Our focus is on implementing lean principles to uncover the true potential of your lab developed methods, your staff, and the overall management of your laboratory.

▶ **COLA - CLIA**

Services Offered

New Lab Set-Up: We provide full-service consulting to get your new laboratory running with validated methods and fully trained personnel. We focus on teaching lean principles and laboratory efficiencies that result in precision, accuracy, and reproducibility on every sample run.

Method R&D/Implementation: Consultants can provide guidance on expansion of methods or simply review your current methods to identify lost efficiencies. PinPoint has critically evaluated hundreds of client methods helping to select and optimize the most robust methodologies. PinPoint's accredited labs are available to stress test and perform inter-laboratory testing to meet the needs of the ever changing analytical laboratory.

Laboratory Personnel Training: Growth and attrition can cause stress on even the best run labs. We can provide you guidance on training new hires and training existing technicians on new methods.

Laboratory Accreditation Assistance: With decades of experience in Clinical, Forensic, Food, Environmental and Workplace accreditation, we ensure our clients become or stay compliant. We can guarantee your lab will be ready for your next audit by using our tried and tested step-by-step pre-audit process.

Experience with USEPA, ISO 17025, CLIA, CAP, COLA, SAMSHA and ASTM standards.

Data Management: Data interpretation and reporting can be major bottlenecks in low, medium, and high-throughput labs. Work with our data experts trained in bioinformatics to manage your data and provide clear, concise, and reproducible reports. Analysts are trained and have expertise with several instrument's software packages.

Expert Testimony Services Available

Detection | Screening | Confirmation

Forensic Toxicology - Biological fluids & tissues

Forensic Drug Chemistry - Seizures & Unknowns

Environmental - Water, Soil & PFAS detection

Food - Toxins & Pesticides

Clinical Research - TDMs, Steroids, Immunosuppressants
