

QUANTCAPS™

Analytic Solutions for Quantitative Analysis in Complex Matrices

QuantCaps™ test kits are injectable-ready matrix-matched reference materials used in drug analysis applications on Gas Chromatography (GC) and Liquid Chromatography (LC) platforms.

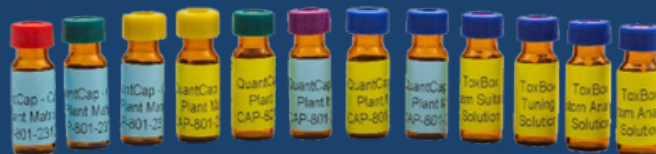

QuantCaps™ products are customized to the matrix, analytes, method, and platform of a laboratory's specific application.

These products allow laboratories to quickly standardize calibrations, validations, and method development for routine testing of drugs in complex matrices.

Ask us about our Cannabis Matrices – Plant | Oil | Wax

- ✓ Pre-Formulated Calibrators
- ✓ Second Source Quality Controls
- ✓ Matrix-Matched Blanks
- ✓ Pre-formulated validation materials to accelerate method development.
- ✓ Quality assurance provided on every batch, complete with certificate of analysis.

NIST Traceable ISO17034 Reference Materials
